MESSAGE FROM THE MANAGEMENT'S DESK

Ms. Ritu Bhalla
(Founder)

Little Scholars is a journey of self-discovery for a child as they grow to become young adults. The school will equip him to excel in academics, and to be savvy in through a Hybrid learning platform. The student will be encouraged to discover their interests, talents and aptitudes, and learn to form their opinions and role in society. This is achieved in a nurturing environment, where the Mentor enacts the role of a Second Parent. An important feature of this process is the school's provision of rich choices, be they in courses of academics, co-curricular activities in artistic, creative and intellectual activities, and in sports and adventure. Engagements with ecology and heritage allow engagements with the community, within the school, in rural areas, or through NGOs, nurturing the ideologies of the school motto 'Service before self'. Leadership abilities to take decisions and to find solutions are imbibed on the sports field, through social interactions, and through positions of responsibility provided in school, aiming not just to nurture the students through their formative years, but also to place them on a continuous curiosity to learn, while carrying the responsibilities of leader with understanding, intelligence, sensitivity and an inclusive attitude.

MESSAGE FROM THE PRINCIPALS'S DESK

Ms. Shikha Gautum
(Principal)

Foundation of every nation is education. The objective of education is to prepare the young to educate themselves. It is a continuous life long process and school is one of the most important components of this process. At LITTLE SCHOLARS, Kashipur the task of guiding children towards their journey to adulthood is taken up with utmost seriousness through strategically and scientifically planned steps so that the students and parents relax and enjoy the process of becoming lifelong learners. Guiding principles of NCF emphasizes on connecting knowledge to life outside school and ensuring learning is shifted away from rote methods to allow holistic development of the child. Besides the familiar academic areas life skills, thinking skills, entrepreneurial skills, sports, creative and performing art are a part of the school time table. Teaching methodology is student centred and designed to capture attention, interest & concentration. Each child has the potential to be the one who can make a difference. Given appropriate support, guidance and opportunity they can create magic that will astonish us. At LITTLE SCHOLARS each child is provided with opportunity to realize his/her potential. We work towards shaping self-confident individuals. Self-confidence has three components i.e. having skills, feeling appreciated and being responsible. Our children will be enabled to transform knowledge (what they know) and attitudes (what they feel and believe) into action (what to do and how to do). Our focus is on students acquiring precision in use of language, refined gentle manners, ability to appreciate culture, power and habit of reflection and efficiency to perform. Education is about the total configuration of ideas, practices and conduct. Schools ought to be a breathing place, providing real meaning of life for students. We continuously strive to achieve this and get better and better every day in every way.

The visit offered students a firsthand look into the dynamic world of modern banking. From understanding account management procedures and transaction processes to exploring digital banking operations, the young learners got an in-depth exposure to how financial institutions function in today's technologically driven economy. Guided by professionals from the HDFC team, the students interacted with various departments, learned about customer service protocols, loan management, and online security measures — all crucial aspects of financial literacy. This interactive experience allowed them to connect theoretical knowledge from their commerce curriculum to practical, day-to-day banking practices. The visit not only enriched their academic understanding but also sparked curiosity about careers in finance, economics, and business management. Such experiential learning opportunities reflect the school's commitment to preparing students for the challenges of the real world. Little Scholars Kashipur extends heartfelt gratitude to the HDFC Bank team for their warm hospitality and valuable insights, which made this educational journey both meaningful and inspiring.
